CHANGES TO ABSTRACT

Please replace the Abstract with the following new Abstract:

ID:6508555322

This invention relates to compounds which are generally IP receptor antagonists and which are represented by Formula (1):

wherein G^1 is selected from the group consisting of \underline{a} , \underline{b}^1 and \underline{b}^2 ,

and A and G² are as defined in the specification; or pharmaceutically acceptable salts or solvates thereof. The invention further relates to pharmaceutical compositions containing such compounds, methods for their use as therapeutic agents, and methods of preparation thereof.
